TO WHOM IT MAY CONCERN

It is my pleasure to write a recommendation letter for Mr. Mohammad Amin Mirhoseini, a former graduate student in Chemical Engineering Department of Ferdowsi University of Mashhad.

I have known Amin since 2017. I was his M.Sc. thesis supervisor, which entitled 'Acclimation of *Chlorella sorokiniana* IG-W-96 strain in different light intensities and subsequent response to light stress'. In addition, he has passed two courses with me in his graduate studies program, namely, Statistics for engineers and Bioreactor Design with outstanding performance.

Additionally, during his study, he also gained practical and theoretical experience as a teaching assistant in Chemical Engineering Thermodynamics II for two years.

Mr. Mirhoseini is a creative thinker who can draw on his own experience and observations to develop thoughtful opinions on various issues. I acknowledge him as a hard-working and intelligent researcher who is highly motivated to pursue his studies at a recognized institute and follow his research interests.

Tedious working schedules, difficult working conditions, collaborating with people, and multitasking are the areas that he can handle very skillfully and makes the work look effortless. He is quite a simple and down-to-earth person with all these charismatic qualities who respects everyone and follows all the rules. He has a pleasant character that makes him an excellent team member in any environment.

I strongly support her application and I am confident that she will be successful in your PhD program. If you have any queries about the academic, research, or related areas, please feel free to contact me at the following email address or phone.
