Letter of recommendation for Mohammad Amin Mirhoseini

I am writing this letter to recommend Mohammad Amin Mirhoseini for your PhD studies. Amin has passed three undergrad courses with me including fluid mechanics I, fluid mechanics II and process control I in fall 2014, winter 2014 and winter 2015 respectively. He got 18.4 out of 20 in fluid mechanics I, 17.9 in fluid mechanics II and 19.3 in process control I. His grades in all courses above was among the best students of the same class. I found him in these courses proactive and very eager to learn.

In general, based on his educational background and his very gentle personal behavior, I recommend him for your PhD program with any type of financial support.

Sincerely,

Dr. Mehdi Panahi
